ABSTRACT

This is the last report on the Commuter Opinion Survey conducted during the spring quarter of 1975 at the University of Tennessee (UT) at Knoxville. It is a complete, detailed report on all findings and tabulations from the survey, including a statement of methodology. An important added feature is a complete cross-tabulation of all results by class level, full- or part-time status, day or evening status, age, employment, marital status, distance to UT, and sex. The survey probed the off-campus students' views of campus problems, their reactions to new ideas and proposals, their feelings toward proposed programs and services designed especially for off-campus students, their general satisfaction, and their use of various campus facilities and services. By far the greatest problem seen was in parking and transportation, followed by finances, off-campus housing, and various problems with landlords. Suggestions and degree of satisfaction were related to these problems. (MSE)

Final Report

1975 Commuter Opinion Survey

Problems, Satisfactions and Habits of Off-Campus Students at UT-Knoxville

by
Don Scroggins, Research Assistant,
and
Jack B. Haskins, Director

October, 1975
Communications Research Center
College of Communications
University of Tennessee, Knoxville

Preface

This is the last report on the Commuter Opinion Survey, conducted during the Spring Quarter, 1975, primarily to answer some questions raised by Vice Chancellor Howard Aldmon and various groups on campus.

The first report was merely a tabulation of the gross statistical results on the questionnaire, directed to the Vice Chancellor's office.

This, the final report, is a complete detailed report on all findings and tabulations from the survey, including a statement of methodology. An important added feature is a complete cross-tabulation of all results by class level, full or part time status, day or evening status, age, employment, marital status, distance to UT, and sex. This enables the interested user to answer such questions as:

> What kinds of people see X (e.g., locating suitable housing) as a major problem?
>
> What kinds of people are in favor of (or opposed to) proposal X (e.g., abolishing all reserved parking)?
>
> What kinds of students are dissatisfied with facility X (e.g., the University Libraries)?
>
> What are the characteristics of students who frequently use service X (e.g., the shuttle busses)?

PART I. SUMMARY

Highlights of the Survey

This was an opinion survey of a representative sample of UT-Knoxville off-campus students. The survey probed into the students' views of campus problems, their reaction to new ideas and proposals, their feelings toward proposed programs and services designed especially for off-campus students, their satisfaction with things around the UTK campus in general, and their use of various campus facilities and services.

Some of the principal findings were as follows:

(1) PROBLEMS: Far and away the greatest problem is parking and transportation. Other major problems are finances, locating suitable off-campus housing, and various problems with landlords. (Question 1 and 2 Tables)

(2) NEW IDEAS: Off-campus students favor, among other things, the repainting of commuter parking lots to hold more cars, the rescheduling of some morning classes to afternoon to help balance the use of University facilities, and the establishment of more commuter activity programs at the University Center. On the other hand, they oppose such things as requiring full-time undergraduates to live at least two quarters in a residence hall, increasing the activity fee, and replacing the quarter system with semesters. (Question 3 Table)

(3) PROPOSED PROGRAMS: Off-campus students indicated the greatest projected use of a carpool program with special parking lots, an express bus from their housing area to campus, and locker facilities placed throughout campus. Two services--a rest/slumber area and a dressing and shower facility--were projected by a large majority as being never used.

(4) SATISFACTIONS AND DISSATISFACTIONS: A majority of the students expressed high satisfaction for their present method of transportation

to campus, the quality of education they are receiving, and the hours of the University Libraries. Students are, on the whole, satisfied with their opportunity to meet people on campus, the social opportunities on campus, and their opportunity to become acquainted with faculty and staff members.

The most extreme dissatisfactions are with the Student Parking Authority and the facilities for handicapped students throughout the campus.

Among three administrators, students were most satisfied with the job being done by Chancellor Jack Reese. A majority of students were also satisfied with President Edward Boling and Vice Chancellor Howard Aldmon.

A majority of students said "no opinion,"an indication of unfamiliarity, concerning the efforts of the Student Government Association in behalf of commuter students, and concerning the job being done by the Office of Off-Campus Housing. (Question 7 Table)

(5) USE OF CAMPUS FACILITIES: Off-campus students indicated most frequent use of The Daily Beacon, the University Libraries, the Book and Supply Store, and the Book and Supply Store check cashing service. Least frequently used are Department of Music recitals, the "FLASH" tape information system, and the Division of International Education. (Question 8 and 9 Tables)

(6) OTHER FINDINGS: The Daily Beacon is the information source which the greatest majority of off-campus students feel keeps them best informed of campus events. (Question 5 Table)

Classes are preferred by most students in the morning only, followed by a combination of morning and afternoon. (Question 15 Table)

Rock is the music preferred by most students, followed by classical and easy listening. A majority listen more than 16 hours per week. (Question 11 and 12 Tables)

For more details of these and other findings of this comprehensive survey of off-campus student opinion, consult the remainder of this report.

The tables which follow show the gross results for each question. "Tables 1-81" in the succeeding section give detailed cross-tabulations of each question by class level, credit hours, day or evening status, full or part time status, age, employment, marital status, distance to UT, and sex.

How This Study Was Conducted

This survey was performed during May-June, 1975, on a scientifically-chosen representative sample of UT-Knoxville commuter students.

The study was under the overall direction of Dr. Jack B. Haskins, with Don Scroggins, Research Assistant, acting as Project Supervisor.

The questionnaire was developed on the basis of discussions with Vice Chancellor Howard Aldmon, Executive Assistant Sammie Lynn Puett, and other persons in the University administration. Three versions of the questionnaire were developed, pre-tested, and modified to form the final questionnaire.

Interviewing was conducted by telephone when possible, with some follow-ups by personal interviews. Interviewers made repeated call-backs in order to reach members of the originally-drawn sample. No substitutions were allowed. Interviewing was conducted by graduate and undergraduate students in the College of Communications. Verification interviews were conducted on about 10% of the sample.

The original random sample of 371 student names was scientifically chosen (by the equal interval from a random start method) from the Spring Quarter, 1975, student directory of 25,820 names. Intensive follow-up procedures, with no substitutions allowed, resulted in a completion rate of 75.47 per cent. Thus, this report is based on a completed sample of 280 students.

See Appendix A for more details on methodology.

PART II. MARGINAL TOTAL RESPONSES

This part contains (a) a narrative description of the findings in somewhat more detail than the highlights, plus (b) Question Tables 1-P15 containing the marginal totals for all responses to each question.

Major Problems on Campus

When given free choice to name the major problem facing off-campus students, the great majority of students named some type of parking and transportation problem. Specifically, the problem most often mentioned was the need for more parking spaces. The free verbatim responses were categorized as shown in Question 1 Table.

On nine specific items mentioned by the interviewer, students responded as follows:

RANK ORDER OF PROBLEMS

Campus parking situation in general
The effect of the economy on student finances
Twelve month leasing policy of some landlords
Locating suitable off-campus housing
Student relations with landlords
Security of personal possessions
Opportunity to become involved in campus activities
Attitudes of University personnel
Racial discrimination in off-campus housing

Question 2 Table shows the detailed responses. Tables 1-9 show cross-tabulation by age, sex, and other variables.

Acceptance of New Ideas and Proposals

A number of new ideas and proposals concerning commuter students were presented to determine the extent of favor or opposition. (Question 3 Table) By far, most students favored repainting commuter parking lots to hold more cars. Rescheduling some morning classes to afternoon and establishing more commuter programs at the University Center also met with a high degree of acceptance. Students strongly opposed increasing student fees and requiring undergraduates to live al least two quarters on campus.

On the 12 ideas so tested, the rank order of favorability was as follows:

RANK ORDER OF
ACCEPTANCE OF NEW IDEAS AND PROPOSALS

Repaint commuter parking lots to hold more cars
Reschedule some morning classes to afternoon
Establish more commuter activity programs at the University Center
Abolish on-street parking from Andy Holt Ave. and replace it with bicycle lanes
Abolish all reserved parking
Abolish all cars from campus and allow only perimeter parking with shuttle bus service
Encapsulate part of Neyland Stadium for indoor events
Establish a separate "commuter center" similar to the University Center
Replace the open lounge at the University Center with individual study booths
Abolish the quarter system in favor of the semester system
Increase the activity fee to provide more student services
Require full-time undergraduates to live at least two quarters in a residence hall

See Question 3 Table and cross-tabulations 10-21 by age, sex, etc., for more detailed information.

Projected Use of New Programs and Services

The success of any new program depends to some extent upon the frequency of its use. How often do off-campus students feel they would use several proposed programs and services? (Question 4 Table)

None of the programs mentioned were projected to be used frequently by large numbers of students. Neighborhood express busses and an organized carpool system were projected to be used frequently by one-third. More than three-fourths of the students say they would use evening shopping hours at the Book and Supply Store frequently or occasionally.

Two programs were said to be never used by a majority of students: a rest/slumber area and a dressing and shower facility.

On the eight programs mentioned, the rank order of projected use was as follows:

RANK ORDER OF
USE OF NEW PROGRAMS AND SERVICES

A carpool program with centrally located parking lots
An express bus service from your housing area to the campus

Locker facilities placed throughout campus
A commuter meal plan for University Center dining facilities
Evening shopping hours at the Book and Supply Store
A program of free afternoon movies at the University Center
A rest/slumber area for commuter students
A dressing and shower facility for commuter students

Question 4 Table gives more information.

Satisfaction with People Services, Organizations, and Conditions

Opinions were asked on 16 specific items relating to the UT-Knoxville campus--administration, services, conditions, and organizations. (Question 7 Table)

In general students appear to be well satisfied with these specific people and groups. A majority of students are satisfied on 12 of the 16 items, and strong dissatisfaction was noted for only one, the Student Parking Authority. The highest satisfaction ratings went to the students' method of transportation to campus, the quality of education, the hours of the University Libraries, and the opportunity to meet people on campus.

Among three administrators, satisfaction was highest for Chancellor Jack Reese. Unfamiliarity with Vice Chancellor Howard Aldmon was evidenced by a sizable proportion saying "no opinion," although a majority of students are satisfied with the job he is doing.

Also receiving a significant proportion of "no opinion" responses were items relating to the job being done by the Office of Off-Campus Housing and the efforts of the Student Government Association on behalf of the commuter student.

RANK ORDER OF SATISFACTION WITH PEOPLE SERVICES, ORGANIZATIONS, AND CONDITIONS

Your method of transportation to campus
The quality of education you're getting
The hours of the University Libraries

Your opportunity to meet people on campus
The social opportunities in general on campus
The job being done by Chancellor Jack Reese
Your opportunity to become acquainted with faculty and staff members
Your opportunity to meet with your academic advisor
The job being done by UT System president Edward Boling
The facilities for commuters at the University Center
Your opportunity to meet other commuter students with similar problems and interests
The job being done by the Head of Student Affairs Howard Aldmon
The efforts of the Student Government Association in behalf of commuter students
The job being done by the Office of Off-Campus Housing
The job being done by the Student Parking Authority
The facilities for handicapped students

Question 7 Table shows detailed responses. Tables 31-46 give cross-tabulations by several variables.

Use of Campus Facilities

Degree of usage was requested on 18 campus facilities and 13 entertainment sources. (Question 8 and 9 Tables)

A majority of off-campus students mentioned only two such facilities as being used frequently, the University Libraries and the Book and Supply Store. The Daily Beacon is also used frequently.

The University Center food service facilities and the Central Ticket Office are both used at least occasionally by a majority of off-campus students.

Facilities never used by most commuter students include University Center lockers, the video tape program, the "FLASH" system, the Arts and Crafts Center, and such entertainment events as music recitals and Knoxville Symphony Orchestra concerts. The Division of International Education received the lowest rating of use.

RANK ORDER OF SERVICES AND FACILITY USE

University Libraries
Book and Supply Store
Book and Supply Store check cashing service, and

Central Ticket Office
University Center food service facilities
Student Aquatic Center
University Center Post Office
University Center Commuter Lounge
Shuttle bus service
University Center Information Desk
University Center Bowling and Billiards Center
Intramurals Office
University Center Arts and Crafts Center, and
University Center Video Tape Program
Counseling Center
University Center locker facilities
Division of International Education
"FLASH" tape information system

RANK ORDER OF ENTERTAINMENT AND RECREATION SOURCE USE

The Daily Beacon
Intercollegiate athletic events
Campus Entertainment Board concerts
UT Theater productions
WUOT-FM
Art Department and museum exhibits
Campus film programs
Intramural sports programs
Individual campus sports clubs
Department of Music recitals
Knoxville Symphony Orchestra concerts
Civic Coliseum play series
The "Issues" lectures

Other Findings

Various other questions help to give a picture of off-campus students. Most think that The Daily Beacon keeps them best informed, (Question 5 Table) and few had suggestions for keeping better informed. (Question 6 Table) The preferred music is rock, followed by classical. (Question 11 Table)

The majority want classes in the morning, or in both morning and afternoon. (Question 15 Table)

Commuter students are satisfied with existing recreational and cultural facilities as evidenced by the majority (71.4%) indicating the need for no more. (Question 10 Table)

Question 1 Table

(1) There are always some problems on any university campus that are felt by the students to need action and solution. What do you think is the most important problem facing off-campus students at UT-Knoxville these days?

Category of "Most Important Problem"	Free response percentage
Lack of sufficient parking spaces	29.6
Campus parking situation in general	16.8
Miscellaneous parking and transportation problems	9.4
Miscellaneous student life problems	5.3
Finances	4.3
Miscellaneous academic problems	4.3
Expense of parking fees	3.9
"Powerlessness" and apathy	3.6
Lack of sufficient student social events	3.2
Parking inconvenient to classes	2.9
Registration	2.9
Quality of education	1.4
Insufficient job opportunities	1.1
No problems or don't know	11.4

Question 2 Table

(2) A number of specific things have been mentioned lately as possible problems for some UT students who live off campus. In your opinion, at this university do off-campus students have a major problem, a minor problem, or no problem with.... .

	Per cent responding				
	Major Problem	Minor Problem	No Problem	No Opinion	Other
(a) The effect of the economy on student finances?	47.9	38.2	12.1	1.4	0.4

Question 10 Table

(10) Do you feel the need for additional recreational and cultural events on campus? If so, what?

Category	Free response percentage
Yes, more or better cultural events	10.4
Yes, more or better recreational events	4.6
Yes, improve facilities generally	3.2
Yes, no specific suggestions	2.5
Yes, miscellaneous	1.4
Don't know	6.1
No	71.8

Question 11 Table

(11) Now, I'd like to find out about some of your outside interests. What type of music do you prefer?

Rock	42.9%
Classical	16.1%
Easy Listening	10.4%
Country/Western	7.5%
Jazz	4.6%
Soul	0.7%
Other	16.4%
Don't know	1.4%

Question 12 Table

(12) How many hours per week do you listen to music?

None	1.4
1-5 hours	23.2
6-10 hours	21.4
11-15 hours	12.5
16-more	40.4

Question 13 Table

(13) When you are reading for pleasure what kind of book do you most often choose?

Not Tabulated

Question 14 Table

(14) What is the title of your favorite book?

Not Tabulated

Question 15 Table

(15) When do you prefer to have most of your classes scheduled?

Morning	47.1%
Morning and Afternoon	23.2%
Evening	17.1%
Afternoon	7.1%
Morning and Evening	2.5%
Other	2.1%
Don't Know	0.7%

Personal Characteristics Tables

(P1) What is your present academic class level as a student?

Freshman	8.9%	Sophomore	12.9%	Junior	20.7%	Senior	25.7%
Master's	18.9%	Doctoral	5.7%	Other	7.1%		

(P2) What is your major, or intended major, at UT?

Not Tabulated

(P3) In what college or school of the University is your major subject located?

Agriculture	2.9%	Engineering	5.7%	Liberal Arts	30.7%
Architecture	2.1%	Evening College	0.4%	Library Sci	1.1%
Business Ad	17.1%	Health-PhyEd-Rec	1.4%	Nursing	4.6%
Communications	3.2%	Home Economics	1.8%	Planning	--

(P4) How many credit-hours are you enrolled for this quarter?

0-8 hours 31.4% 9-more hours 68.6%

(P5) Are you a day or evening student?

Day 77.1% Evening 22.9%

(P6) Are you currently classified as an in-state or out-of-state student?

In-state 90.0% Out-of-state 10.0%

(P7) What is your age?

Under 18	--	26-29	12.5%	50-more	2.5%
18-21	35.0%	30-39	13.2%	Refused	0.4%
22-25	31.4%	40-49	5.0%		

(P8) Are you employed?

Yes 60.4% No 39.6%

How many hours are you employed per week?

10 or less	7.9%	21-39 hours	11.8%
11-20 hours	15.4%	40-more	24.4%

(P9) Are you married or single?

Married 35.8% Single 64.3%

How many people, including yourself, are in your family (if married)?

Two 19.6% Three 7.5% Four 3.6% Five-more 5.7%

(P10) How do you generally get to school--by car or walk or what?

Car 85.0% Walk 12.9% Bicycle 1.1% Motorcycle --

Bus 0.4% Other 0.7%

(P11) How far would you say you must go to reach UT one way?

1 mile or less	18.9%	16-20 miles	5.4%
2-4 miles	17.5%	21-30 miles	6.4%
5-9 miles	24.3%	31-more	5.4%
10-15 miles	22.1%		

(P12) How many days a week did you come to campus during the average week in Spring Quarter?

One	7.1%	Three	8.9%	Five	46.8%	None	6.4%
Two	8.2%	Four	10.4%	Six-more	12.1%		

(P13) How many years have you attended UT at least one quarter per year?

One 26.1% Two 17.9% Three 16.1% Four 19.6% More 20.4%

(P14) This final question is optional. What is your race?

White 94.6% Black 2.5% Other 0.7%

(P15) Sex: Male 52.9% Female 47.1%

PART III. CROSS-TABULATION TABLES 1-81

This is a complete cross-tabulation of all structured responses by age, sex, class level, credit hours, day or evening status, employment, marital status, and distance to UT. These tables can help identify the kinds of students associated with certain important responses.

For example, Question 7 j determined that 31.1 per cent of off-campus students are dissatisfied with their opportunity to meet with their academic advisor. What kinds of students are most dissatisfied? A look at Table 40 shows that the most dissatisfied students tend to be sophomores (58.3%), students aged 18-21 (40.8%), and those who attend school in the evening (35.9%). Tending to have "no opinion" are students aged 40-49 (14.3%) and those who attend part time (10.9%). The most satisfied groups tend to be doctoral students (87.5%), those who live one mile or less from campus (69.8%), and those aged 26-29 (68.6%).

Or take Question 3 a, which shows that about 39 per cent of commuter students say that they favor an action to abolish all reserved parking. Evening students tend to favor this more, but otherwise there are no great differences among kinds of students.

Question 9 a deals with use of The Daily Beacon. The Beacon is generally used "frequently" by 79 per cent of the off-campus students. This use is heaviest with juniors (87.9%), full-time students (89.9%), day students (89.4%), and those aged 18-21 (93.9%).

A similar analysis can be applied to all of the 81 tables in the cross-tabulation section. It is possible to identify those giving what are considered "favorable" responses or "unfavorable" responses. An important group are those persons who give "don't knqw" or "no opinion" responses. These responses reflect unawareness, ignorance, or apathy, and students making these responses represent a challenging group for whom specific information campaigns might be devised. For example, Question 7 m reveals that 53.6 per cent of commuter students have "no opinion" about the job being done by the Office of Off-Campus Housing. Females (53.3%) and evening students (67.2%) are most likely to have no opinion.

Due to small sample sizes in some subgroups, a difference of at least 8-10 per cent from the general population should be obtained before any subgroup is considered to be significantly different.

*Table 1: STUDENTS' RATING OF THE EFFECT OF THE ECONOMY ON STUDENT FINANCES

*Question 15: When do you prefer to have most of your classes scheduled?

---

[1] Part time = 1 to 8 hours; full time = 9 or more hours.

NOTE: Some subgroups will not always add to 280 due to omissions because of too few cases for analysis.

APPENDIX A. METHODOLOGY

Population. The population for this survey was designated as "all day and evening students enrolled at UT-Knoxville who do not reside in University housing or fraternity houses." Those enrolled at UTK but attending classes at other centers (e.g., Tullahoma, Morristown, Sevierville, etc.) were also excluded from the population.

Sample selection and size. The Office of Admissions and Records of the University furnished an alphabetized list of all day and evening students enrolled at UTK during the Spring Quarter, 1975. This list provided the name, local address, and local telephone number (among other data) for the 25,820 students enrolled at that time.

A sample size of 370 was decided upon as adequate for obtaining a minimum of 200 completed questionnaires. This yields a sampling error of 2.6%, where p = 50%.

Since the alphabetized list included all UTK students regardless of residence or place of attendance, a proportionately larger sample was drawn to compensate for removal of those students. This resulted in a gross sample size of 662.

A sampling interval of every 39th name (25,820/662 = 39) from a random starting position between 1 and 39 was used. This procedure provided 662 student names. From this list all students in University housing and those attending off-campus centers were removed. This resulted in a final sample size of 371, upon which this survey was based. Of these, 57 did not have a listed telephone number. (Follow-up through telephone information sources or personal interview enabled many of these to be included in the sample.)

Completion rate. Of the 371 originally-drawn designated respondents, interviews were obtained with 280, a completion rate of 75.5 per cent. With available resources of time and personnel, this rate exceeds the minimum allowable rate of 50 per cent and comes very close to a maximum expected rate of 80 per cent. The sample attrition is due primarily to refusals, generally unavailable respondents, and designated respondents who had moved without leaving forwarding addresses or phone numbers. The time available for interviewing did not permit further follow-up, which quite likely would have brought more respondents into the final sample.

Questionnaire. The basic format for the questionnaire arose from two previous studies, Campus Opinion Surveys # 1 and # 2, done in 1973 and 1974 respectively. The questionnaire was designed to be easily coded and to enable keypunching of the data directly from the questionnaire forms by the UT Computing Center. The entire questionnaire is displayed in Appendix B. Question items for this survey arose from two basic sources: (1) a modification of topics raised in Campus Opinion Survey # 2 and (2) discussions with Vice Chancellor Howard Aldmon and Executive Assistant Sammie Lynn Puett. Results of this study will be helpful to the administrative decision-making process.

The questionnaire went through several pretesting and modification stages. Trial telephone interviews were then carried out on each draft by the Project Supervisor under field conditions and subsequent revisions were made. The questionnaire was arranged to be suitable for both telephone and personal interviewing.

Despite the apparent length of the questionnaire, interview time was well within reasonable limits. For 280 questionnaires the mean interview time was 17.3 minutes (minimum, six minutes; maximum, 45 minutes). Interviewers received few complaints about the length of the interview.

Interviewers. Interviewers used in this study were of two kinds: (1) students enrolled in a research course, Journalism 4990, in the College of Communications (student participation in this study was a course requirement) and (2) one paid interviewer and the Project Supervisor. Students were also involved in other phases of the survey.

The Project Supervisor conducted briefing sessions for the students prior to the field work.

Student interviewers turned in all incomplete questionnaires within ten days after the start of actual interviewing; the paid interviewer performed all subsequent interviewing. This proved to be a satisfactory method for this study. Students were initially assigned approximately 20 interviews each.

Interviewing procedures. When the sample was drawn, the names, addresses, and telephone numbers of the designated respondents, along with a numerical identification, were written on questionnaire forms.

While this task was being done, the student interviewers were being briefed in the use of the questionnaire and were instructed to practice the interview on five names drawn from the student directory (alphabetically adjacent to their own names). Two members of the drawn-sample were caught by this "practice" procedure. Final questions about classifying respondents and general interviewing practices were also being answered.

Questionnaire forms were randomized before distribution to student interviewers.

Before assignment to interviewers, people in the sample who lived outside of Knox County were removed from the list and assigned to five "long-distance specialists" who had access to the University's WATS lines. The other interviewers were instructed to turn over their long-distance calls (which had escaped the first purging of the list) to the Project Supervisor who then reassigned these long-distance respondents to the specialists. Interviewers were instructed to make as many callbacks as necessary (and possible within the alloted time) to reach the respondent.

The typical student interviewer completed interviews with about two-thirds of his 20 assigned respondents during the ten days in which he was required to participate. The remainder of the interviews was obtained by the paid interviewer.

Interviewers were told to do their interviewing by telephone. Personal interviews were allowed when the respondent was (a) unreachable by the telephone or (2) apparently had no telephone. Personal interviewing was a last resort because of the unpredictable schedules of the student respondents and the time involved in personal interviewing.

During the interviewing process, the primary question was allowed to be repeated if needed to maintain tempo and respondent orientation. Interviewers, as noted on the questionnaire, were asked to write down the first problem, and only the first problem, mentioned on open-ended questions (Nos. 1, 6, and 10). They were instructed to probe if the first answer was unclear, vague, or ambiguous.

Interviews were verified by having every tenth respondent answer a short additional questionnaire at a later date. (See Appendix C) These reinterviews were conducted by two student interviewers who did not know the identity of the original interviewer. No instances of interviewer cheating were found.

It bears repeating that a high proportion of students have telephones, interviews were not overly long, and that most of the material in the questionnaire was of high interest to the respondents. Therefore the use of telephone interviewing proved appropriate.

Survey timetable.

April-May	Questionnaire design, survey planning, questionnaire pre-testing
May 1-12	Materials preparation
May 12-15	Sample drawn
May 15	First interviewer briefing
May 20	Interviewer kits assembled
May 22	Final interviewer briefing kits handed out, field work begins
June 3	Student interviewing ends, professional interviewing underway, verification begins
June 8	All interviewing ends, coding begins
July 2	Coding ends

APPENDIX B

QUESTIONNAIRE

Communications Research Center
Commuter Opinion Survey—Spring, 1975

CALL RECORD SHEET

Respondent's Name____ ID. #__ __ __

Phone no. ______________ Address____
